New Virtual Machine Wizard ✕

Select a Guest Operating System
Which operating system will be installed on this virtual machine?

Guest operating system

○ Microsoft Windows
● Linux
○ VMware ESX
○ Other

Version

Ubuntu 64-bit ⌄

Guest Operating System Installation
A virtual machine is like a physical computer; it needs an operating system. How will you install the guest operating system?

Install from:

○ Installer disc:

No drives available ⌄

○ Installer disc image file (iso):

C:\Users\durga\OneDrive\Desktop\CC Lab Setup\ubu ⌄   Browse...

● I will install the operating system later.
The virtual machine will be created with a blank hard disk.

New Virtual Machine Wizard   ✕

Name the Virtual Machine
What name would you like to use for this virtual machine?

Virtual machine name:

Specification

Location:

C:\Users\durga\OneDrive\Documents\Virtual Machines\Specific   Browse...

The default location can be changed at Edit > Preferences.

Specify Disk Capacity
How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host
computer's physical disk. These file(s) start small and become larger as you add
applications, files, and data to your virtual machine.

Maximum disk size (GB):   15.0

Recommended size for Ubuntu 64-bit: 20 GB

◯ Store virtual disk as a single file
🔘 Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another
computer but may reduce performance with very large disks.
